

SAP S/4HANA SD – End-to-End Order-to-Cash (O2C) Greenfield Implementation

Client Information

- **Client:** Az-tech Solutions PVT. Ltd.
- **Implementation Type:** Greenfield Implementation
- **Module:** SAP S/4HANA Sales & Distribution (SD)
- **Environment:** SAP S/4HANA
- **Duration:** 5 Days
- **Prepared by:** Gourab Karmakar

Business Scenario

Az-tech Solutions PVT. Ltd. is a retail trading organization specializing in garment distribution through multiple sales channels. The company previously managed sales orders, pricing, inventory, deliveries, and invoicing using manual spreadsheets, resulting in pricing inconsistencies, delayed order fulfilment, and poor inventory visibility.

To modernize its sales operations, the company decided to implement **SAP S/4HANA Sales & Distribution** through a **Greenfield Implementation**, where the complete SD organizational structure and business process were designed from scratch.

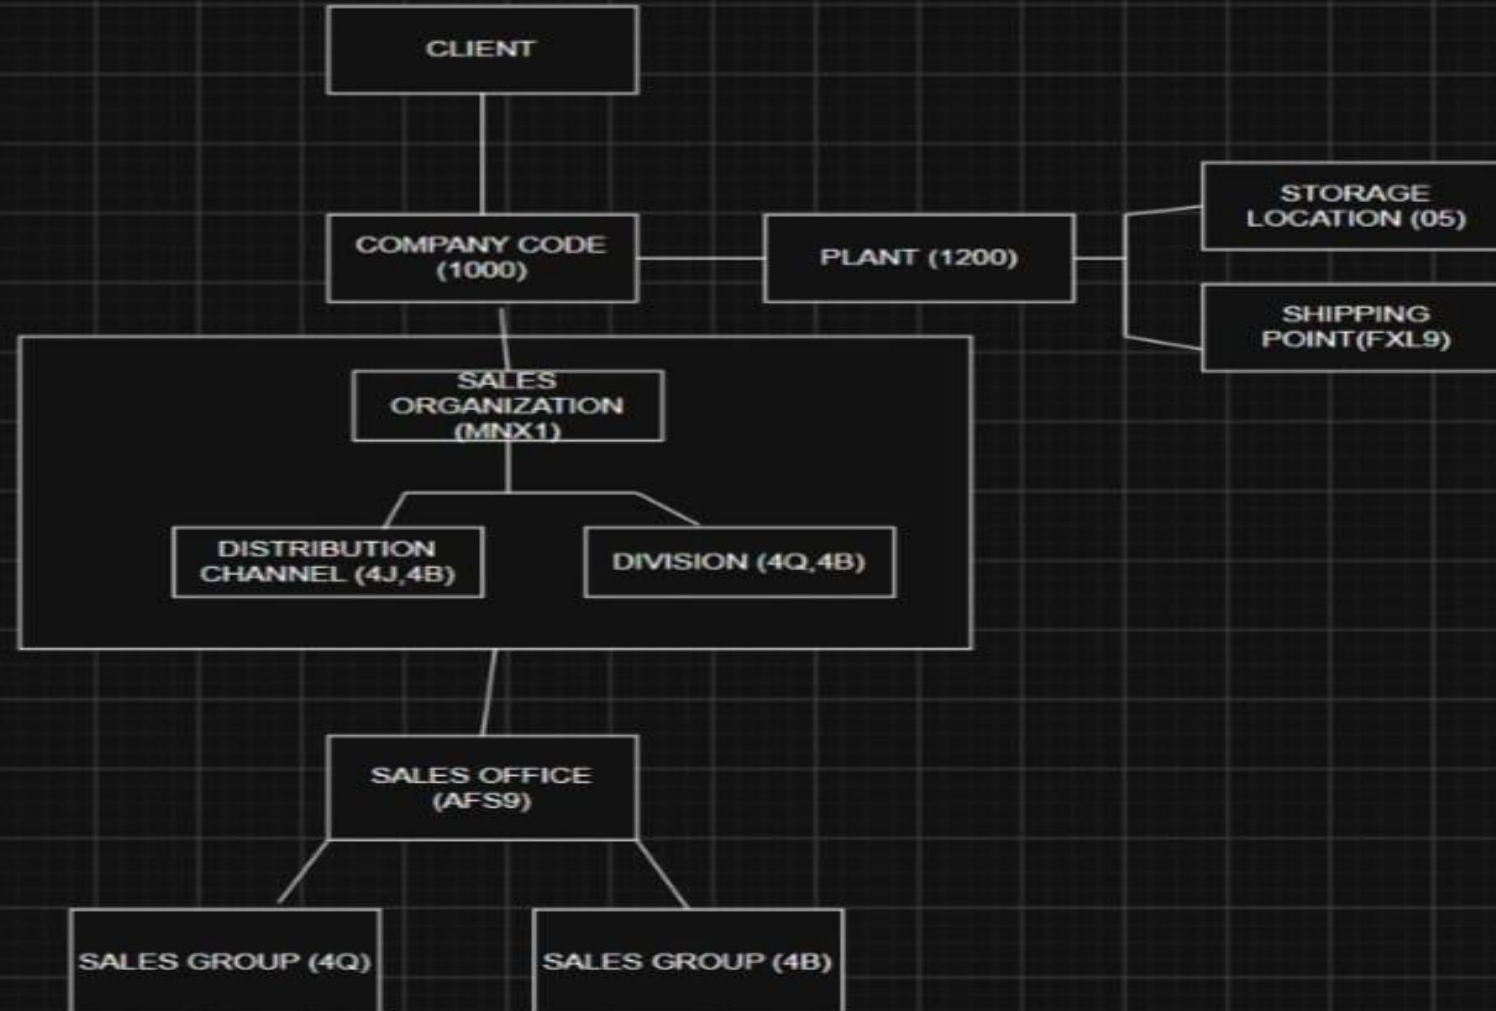

The objective of this project was to automate the complete **Order-to-Cash (O2C)** lifecycle while integrating pricing, logistics, inventory, billing, revenue accounting, consignment, and advanced returns

Project Objectives

The implementation was designed to achieve the following business goals:

- Build a complete SAP SD Enterprise Structure.
- Create Customer and Material Master data.
- Implement Pricing & Condition Technique.
- Configure Shipping Point and Storage Location Determination.
- Manage inventory through MIGO and MMBE.
- Execute the complete Inquiry-to-Billing process.
- Integrate SD Billing with Financial Accounting.
- Support Consignment and Advanced Returns scenarios.
- Create end-to-end Revenue account and assign with G/L account.
- Maintain text determination for sales order, delivery and billings.

Customer master Sales Area Configuration from XD03

The screenshot displays the SAP 'Display Customer: Sales Area Data' (XD03) interface. The top navigation bar includes menus for Customer, Edit, Goto, Extras, Environment, System, and Help. The title bar shows the SAP logo and the window title 'Display Customer: Sales Area Data'. Below the title bar, there is a search bar and a list of tabs: Other Customer, General Data, Additional Data, Empties, Additional Data, DSD, Sales Area Information, DSD, and More. The main data area shows the following fields:

Customer	1000000115	GOURAB KARMAKAR	ASANSOL
Sales Org.	MX1	AZTECH SOLUTION J	
Distr. Channel	4J	Walmart	
Division	HJ	DGP J	

Below the data area, there are four tabs: Sales, Shipping, Billing Documents, and Partner Functions. The 'Sales' tab is selected, showing the 'Sales order' section. This section contains various fields for sales order configuration, including Sales district (000005), Sales Office (AFS9), Sales Group (4Q), Customer group (01), ABC class, Currency (EUR), and Order probab. (100 %). There are also checkboxes for 'Switch off rounding' and 'Product attributes'. The 'Pricing/Statistics' section shows Price group, Cust.pric.proc. (1), Price List, and Cust.Stats.Grp. The 'Agency business' section has checkboxes for 'Relevant for agency business' and 'Doc. Index Active'. The bottom of the screen shows a Windows taskbar with various application icons and system information.

Project Outcome

The Greenfield implementation successfully delivered a fully integrated SAP S/4HANA SD solution for Az-tech Solutions Pvt. Ltd. The project automated Enterprise Structure, Master Data, Pricing, Shipping, Inventory, Billing, Revenue Account Determination, Consignment Processing, and Advanced Returns Management, enabling a complete end-to-end Order-to-Cash business process.
